

Rowan Vale

PhD student in Computer Science · Example University · Port Alder, WA
rowan@example.edu · github.com/hangfolio · ORCID 0000-0002-1825-0097

EDUCATION

PhD, Computer Science , Example University	2025 – 2029 (expected)
Storage systems and crash consistency. Advisor: Dr. Ada Advisor.	
BS, Computer Science , Example College	2019 – 2023

RESEARCH

Graduate Research Assistant , Example University	Jan 2025 – present
- Built a fault-injection harness for key-value stores. - Tidepool: replays crash points to find lost writes; found 12 of 12 seeded bugs with no false positives.	

EXPERIENCE

Software Engineering Intern , Example Corp	Jun – Aug 2024
Cut API latency from 3 s to 300 ms with a read-through cache for the orders API.	

PUBLICATIONS

A. Author*, [Rowan Vale](#)*, and P. Investigator. *Bounded Staleness for Edge Caches*. Proceedings of the Example Conference (EXC '24), Lisbon, 2024. doi:10.5555/exc24.0001

* Equal contribution

[Rowan Vale](#). *Finding Lost Writes by Replaying Crash Points*. In preparation.

TEACHING

Teaching Assistant, Distributed Systems , Example University	Fall 2025
Ran weekly labs for 60 students; wrote the lab notes on quorum reads and writes.	

SKILLS

Rust, Go, C, Python · Linux storage stack, fault injection, TLA+ · Benchmarking and tracing

Rowan Vale is a made-up person, and this CV is an example file for the hangfolio demo site. It is dedicated to the public domain (CC0 1.0).
